

SPOT G3 Firmware

If you discover that your tracking is missing or your device is not operating correctly then please follow these steps as a first course of action.

Download the Spot G3 Updater to either a MAC or Windows based PC. The link to the latest version can be found here. www.Spotnz.com/spotG3.html

Once installed.

1. Launch the application.
2. Ensure you have the Authority code found in the battery compartment.
3. Turn the device off (THIS IS IMPORTANT).
4. Connect the device via the micro USB cable to the port on the back of the device.
5. Wait for the app to find and recognise the device, the ESN of the G3 will show in the APP.

ESN: 0-2853838

Please enter your Auth Code and click Submit.

Auth Code:

 **Waiting for authorization**
Your Auth Code can be found here. >

 **Firmware is up to date (v1.10)**

6. Enter the Authority code and hit **submit**

ESN: 0-2853838

Currently on your device:

Tracking Interval:	2.5 minutes
