REMOTE MANAGEMENT SOLUTIONS

YOUR TRIPLE AAA SAFETY SOLUTION

ALWAYS SAFE
ANYWHERE
ANYTIME

At TrackMe we are excited to be at the forefront of developing technologies that help protect your staff. The nature of remote work means that staff can be out of cellphone coverage and/or alone. For some they will also be working late at night. These conditions and situations are a threat to their health and safety.

Using satellite devices such as the GARMIN® inReach, monitored by a 365/24/7 Call Centre, your staff are linked to help and support wherever they are, at whatever time. From a fully managed monitoring service, to simple automated daily check-in schedule for Remote Workers, we can deliver a fully customised supported system.

Our Services:

- All your staff can be managed with our Passive Alert Software (PAS) including automated profiles giving you reports when staff don't report in as scheduled via SALUS Professional. Simple time based safety or select the ultimate solution including GetHomeSafe Corporate.
- Fully managed New Zealand based call centre services, so you can free up valuable staff time and we cover your staff 365/24/7, with NZ Rescue Co-ordination Centre also on alert for SOS calls included in all plans.
- A New Zealand developed device and message management portal, giving you access to all the settings and message delivery for the satellite devices.
- TrackMe customised tracking pages showing all your devices split into regions or teams in one place no matter what the service or device.

- Satellite connections for all your current devices and extending your coverage with the use of Garmin inReach satellite communicators.
- Providing a consolidated billing platform that can bill independent departments and operates with purchase order referencing, simple and cost effective plans.
- We sell and service Spot Messengers, Delorme and Garmin inReach devices, as well as Iridium satellite phones and Iridium GO WiFi.

TrackMe is New Zealand based and developed with a mind for protecting Remote Workers and Adventurers. The risks associated with remote environments has meant the solutions developed have to be fool proof, robust, and trusted to deliver emergency responses in the shortest time. Trusted by event managers, and now some of New Zealand's biggest employers of remote workers, TrackMe delivers a simple interface so staff can be easily managed and responded to in times of need.

Our dedicated agents supply industry advice, adventure experience and have a share in the service they provide. We engage like-minded individuals whose purpose is to see companies supported the best way they can, they trust the process and use the solutions.
